

Hussain Ahmed Al Aradi

Software Engineer

Bahraini | +973-33544719 | Gmail | LinkedIn | GitHub | Portfolio

A software engineer with hands-on experience across full-stack web, mobile, and enterprise systems. Passionate about clean architecture, problem-solving, and delivering high-performance, maintainable solutions. Collaborative team player with a strong work ethic and consistent record of meeting deadlines.

EXPERIENCE

Software Engineer | *Safeway Express Cargo Logistic*
Sep 2025 – Present

- Developing and maintaining full-stack features using Next.js and ASP.NET (C#).
- Building responsive, high-performance web interfaces and RESTful backend services.

Odoo Developer | *Open-Inside*
Sep 2024 – Sep 2025

- Developed and customized Odoo modules to meet client-specific business requirements.
- Integrated third-party APIs into the Odoo ecosystem, extending platform functionality.

Trainee | *University of Bahrain*
Oct 2023 – Jan 2024

- Developed a Python automation script to extract WhatsApp group participants and phone numbers into Excel sheets with a single click.
- Gained proficiency in Python libraries for digitalization and workflow automation.
- Used Photoshop to design promotional posters for marketing efforts.

EDUCATION

BSc. Software Engineering
University of Bahrain | Feb 2017 – Feb 2024

PROJECTS

e-Clinic — *Laravel · PostgreSQL · Redis · Angular · Flutter*
Clinic management platform covering appointments, treatment plans, medical records, lab and X-ray orders, pharmacy, HR & payroll, billing & insurance claims, and double-entry accounting. Ships an Angular staff app with a patient portal and a Flutter mobile app with QR-code check-in, real-time staff chat and notifications, and permission-based access for nine roles (doctor, nurse, pharmacist, cashier, accountant, HR, and more). Deployed live on Render.

TaskFlow Proto — *Angular · Express · Node.js · MongoDB · TypeScript*
Trello-style team task manager with Kanban boards, drag-and-drop cards, milestones, card discussions, and an ordered activity history. Supports team invitations, team chat with attachments and mentions, and a read/unread notification inbox, with server-enforced Admin/Leader/Member access, JWT authentication, and Zod validation. Deployed live on Render with MongoDB Atlas.

Books Build Minds — *Flask · PostgreSQL · Next.js · Chakra UI · Flutter*
Library and bookstore platform with Next.js web and Flutter mobile clients on a shared Flask REST API. Readers browse, borrow, rent, return, and purchase books through Tap payment integration (sandbox) with downloadable

receipts, and review purchased titles. Administrators manage the catalog, inventory, bulk imports, and fine-grained roles and permissions; includes category rankings by rating and sales, advanced search and filters, and full technical documentation.

CareTrack — *Java · Spring Boot · React · React Native · PostgreSQL*
A full-stack healthcare management system built for hospitals and clinics. Supports multiple hospitals on a single platform, with doctor and room scheduling, patient medical history tracking, and a mobile app for patients to book appointments and manage their own records. Designed with security and data privacy in mind, with role-based access for admins, staff, and patients.

Fun Travels Tour — *Java · Spring Boot · Next.js · React Native · PostgreSQL · Stripe*
Multi-agency travel operations platform managing agencies, branches, tours, transportation inventory, auto-generated seat layouts, reservations, and QR-coded passenger tickets. Features tour scheduling conflict validation, reservation holds with capacity protection, Stripe payments with wallet and transaction ledger, bulk Excel import, PDF/Excel export, and customer support workflows, secured with JWT and six-level role-based access (Admin, Owner, Manager, Employee, Customer, Support Agent). Server-side pagination, sorting, and filtering across the Next.js web portal and React Native mobile app.

Portfolio — *Angular · TypeScript · Tailwind CSS · Spartan UI · GitHub Pages*
Personal portfolio website showcasing my projects with screenshots, tech stacks, repository links, and live demos. Built with Angular 21, Spartan UI components, and Tailwind CSS 4, with light and dark themes, a fully responsive layout, project filtering, and optimized WebP images. Deployed live on GitHub Pages at hussainalaradi5.github.io/portfolio.

Movie Inspector — *React · Flask · PostgreSQL*
Advanced cinema management and booking platform streamlining movie reservations and administrative tasks. Designed with UML diagrams and a clean separation between frontend and backend layers.

Car Cast — *React · Express · MongoDB · External APIs*
Car rental solution with an intuitive reservation interface enhanced by integrations with weather, casting, and car data APIs.

Video Waves — *React · Node.js · Chakra UI*
Video-sharing platform with drag-and-drop upload, infinite scroll, likes/dislikes/comments, and secure user authentication and profile management.

Ehsebha — *React Native · Express · MongoDB*
Cloud-based mobile Point of Sale system for reservation management and streamlined POS operations. Built as a University of Bahrain capstone project.

Fantasy Cards Game — *React · JavaScript*
Card-matching game with three difficulty modes: Easy, Normal (find 3 pairs), and Challenge (5 pairs within 3 minutes or 20 turns).

SKILLS

Core Strengths: **C# / ASP.NET**|**Java / Spring Boot**
Also familiar with: JavaScript/TypeScript, Python, Java, C++, Go, PHP
Frameworks: Next.js, React / React Native, Flutter, Angular, Laravel, Express, Flask, Odoo
Databases: PostgreSQL, MySQL, Oracle, MongoDB
Tools & Other: Node.js, HTML/CSS, UML, Git
Spoken Languages: Arabic (Native), English (Fluent)

CERTIFICATIONS

Software Engineering Immersive — Graduation Certificate

General Assembly, Bahrain | Nov 2024
